## II. Facts & figures

City/Municipality	
German state/Country	
Population	
When was the project realised?  Can the project be described as a one-off measure or was it characterised by an ongoing process?	
How can the overall "rail station environment" project be spatially defined/demarcated? (please enclose aerial image)	
What were the costs for the overall project?	<p>Construction costs and investment:</p> <p>Costs for the management of the public space:</p> <p>Other costs:</p> <p>Total costs:</p>
Was or is any assistance provided by:	<p>German government</p> <p>Regional state government</p> <p>City/Municipality</p> <p>Private</p> <p>EU funding</p> <p>Other</p> <p>None</p>
If so, what was the nature of this support?	<p>Financial</p> <p>Non-cash support</p> <p>Personnel                      Full-time paid                      Honorary</p>
Has the project already received an award?	<p>No</p> <p>Yes                      if yes, when?</p>

<p>Were or are there any conflicts/challenges?</p>	<p>No</p> <p>Yes if yes, which?</p>
<p>Which competencies/responsible persons/owners interacted with each other during the course of the project?</p>	
<p>Were there any challenges due to different areas of responsibility of owners or residents/neighbours?</p>	<p>No</p> <p>Yes If so, how were they handled?</p>
<p>Which forms of utilisation characterise the diversity and quality of the rail station environment? (max. 3 mentions)</p>	
<p>Which mobility services are provided, and how many of them are there?</p> <p>How high is capacity utilisation?</p>	<p>Sharing facilities (bike/car/eScooter):</p> <p>Charging stations for eMobility:</p> <p>Bicycle parking spaces:</p> <p>Bicycle garage:</p> <p>Taxi parking space:</p> <p>P+R, car parking spaces, underground carpark, multi-storey carpark:</p> <p>Other:</p>

**III. Description of the project (please complete in the predefined form)**

1. Briefly describe the redesign concept for the rail station environment. Please outline in particular the reason, the objective, central challenges and, where applicable, conflict solutions as well as the time frame. (Max. 400 words)

2. What makes the design concept a success in terms of improving the urban development and social environment? Which elements/measures made a significant contribution to enhancing ambience and amenities (e.g. cleanliness, safety, greening, utilisation mix)? (Max. 400 words)
